

## **THINGS TO BRING WITH YOU TO THE FARM**

Linens / sleeping bags for the cabins and wash house. We have cold nights in these New England mountains so you are advised to come prepared.

Boots are recommended. There is no pavement on the farm. Some areas are often wet or muddy. Tall grass and woods areas are wet in the mornings from dew.

Bug Protection and Sun Protection: This is just the right habitat so we actually have VERY FEW MOSQUITOES and black flies and a nice breeze here most of the time sends those away, but you may want to bring some protection especially if you are here in the spring.

Flashlights, lanterns and /or head lamps are recommended for site or cabin use and walking around the farm at night.

All camping & cooking gear for preparing meals over the camp fire.

Fires are permitted only in the provided fireplaces. Firewood is available for \$5 a day. Please do not gather or cut any on your own or bring it along with you.

Four Springs Farm water is EXCELLENT! You will not need to bring bottled water to the farm.
